NovaTec Mobile Gateway
features
SMS-Email-SMS

NovaTec Kommunikationstechnik GmbH
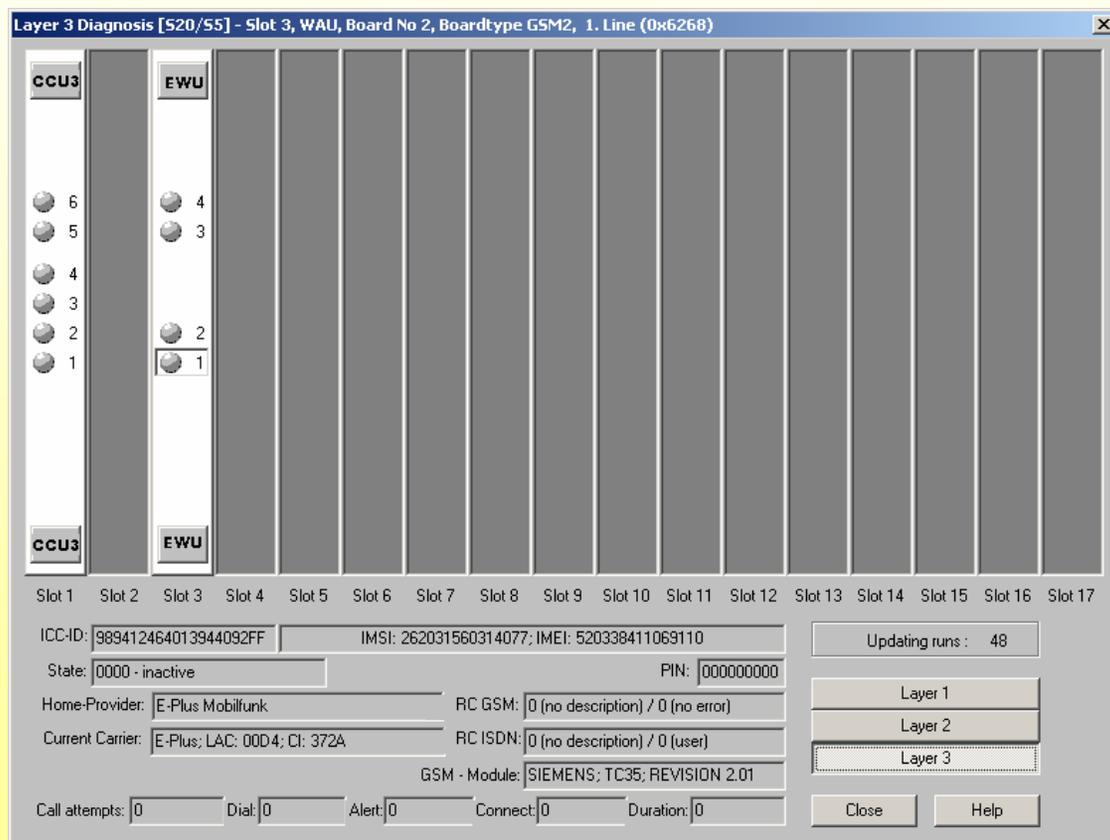

welcomes

YOU

to this presentation

Basics

➢ The new SMS/Email functionality enables the Novatec gateways to send SMS messages to single or multiple targets from Emails, and to send Emails to single or multiple targets as SMS messages.

➢ This functionality is provided by the EWU (Enhanced Wireless Unit) module.

NMG requirements

To implement the SMS/Email functions a CCU 3 must be installed along with at least one EWU.

How to use SMS-Email-SMS

A typical browser window can be used to write Emails and send them to mobile phones.

How to use SMS-Email-SMS

Information sent by Email will be received by the mobile phone user as a SMS and vice versa.

Messages sent by SMS will be received by the recipient as an Email.
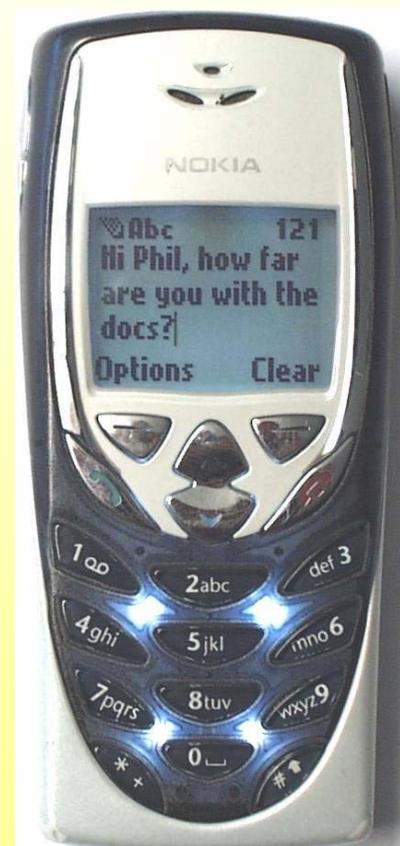

Writing an Email to a mobile phone

dev_wo_xx   devlopment@tmg.de   marketing@tmg.de   production@tmg.de

Alias list members

Marketing@nmg.de

Production@nmg.de

Alias configuration checked to see which recipients are under Alias group and then message sent as an SMS to the multiple addressees.

New   Edit   Copy

9

Alias configuration

With the alias feature you can list multiple addressees under one name, e.g. marketing@nmg.de.

All numbers or names on this list will then receive the message, these can be members of production teams or marketing representatives and do not have to be in country to receive these messages.

Contact us

If you would like to find out more about this application, or have

any questions please contact NovaTec at info@novatec.de

or

just contact our sales team on the following number:

+49 (0)5251 1589-610

Thank you for your attention!
