We change the shape of the world

NovaTec release information NMS 7.0.4

1   **Firmware**

2   **Changes**

3   **PC Requirements**

4   **Install and start NMS 7.0.4**

1.   Firmware
- If the connection to target does not use TLS, NMS 7.0.4 works with firmware release 00.06.06.15 and above.

- If the connection to target uses TLS, NMS 7.0.4 works with firmware release 00.07.00.63 and above.
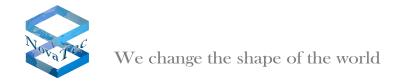

2.   Changes
Network Services:
- The validation depth for SSL/TLS is now limited to 9 levels.

3.   PC Requirements
The minimum requirement of a PC, where NMS 7.0.4 is installed, should be:

- Windows XP or Windows Vista

- 2 GB RAM

- 3 GHz CPU

- 1 GB free disk storage

- CD Drive

4. Install and start NMS 7.0.4:

- Please deinstall all previous NovaTec NMS releases.

- Insert CD and start setup.exe.

- Insert a NMS-dongle in a USB slot. Please note that if you are using a virtual machine, you need to install a IP-USB-HUB and insert the NMS-dongle in the IP-USB-HUB.

- After installing NMS 7.0.4 with setup.exe, start NMS 7.0.4 by

  START->All Programs->Novatec->Network Management System 7.0.4->job Management for configuration.

  START->All Programs->Novatec->Network Management System 7.0.4->Network Services 7.0.4.

  START->All Programs->Novatec->Network Management System 7.0.4->Network Management System 7.0.4 for the Server.
